LogTen is an integrated logbook that helps flight training programs graduate professional pilots who are immediately ready for the working world.

CAREER-READY FROM DAY ONE

Your students' careers don't start at graduation, they start with their very first flight. Every hour logged builds into a verified professional record trusted across the industry. LogTen turns training time into career capital, giving schools a proven way to launch students toward hiring pathways.

THE GOLD STANDARD FOR AIRLINES

Airline recruiters don't gamble on data. They trust LogTen reports above all others. By adopting LogTen, your school delivers graduates with a credential that speaks volumes: precision, professionalism, and readiness. With 100+ report formats, students step into interviews with the same credibility airlines use to hire.

SMOOTH TRANSITION FOR YOUR PROGRAM

Paper records and scattered systems slow schools down. LogTen makes the move simple: import history, connect to Flight Schedule Pro, and keep every record intact. No lost data. No extra admin. Just a clean, reliable logbook that carries students from training to career.

BUILT INTO YOUR TRAINING SYSTEM

Students already plan flights, track lessons, and record progress in Flight Schedule Pro. LogTen extends that same environment into a professional logbook recognized by airlines. For flight departments, training data flows forward without duplication, reinforcing compliance today and career readiness tomorrow.
